

NEW

TM320 | TELESCOPIC WHEELED LOADING SHOVEL

TM320 Telescopic Wheeled Loading Shovel

Gross Power: TM320 (93kW/125hp); TM320S (108kW/145hp); TM320WM (93kW/125hp), Lift Capacity: 3,200kg, Lift Height: 5,200mm

WHY COMPROMISE?

With the new JCB TM320, TM320S and TM320WM, you won't have to compromise. Class-leading engine power and torque, lift capacity, load-sensing hydraulics and super-fast cycle times redefine performance in a telescopic wheeled loader. The JCB EcoMAX T4i engine needs no additional aftertreatment like a DPF or SCR – ensuring optimum visibility and manoeuvrability. While the luxurious cab, SRS, TorqueLock and joystick-mounted gear changes give unrivalled comfort and efficiency.

While anything else is just a compromise.

UP TO 12% EFFICIENCY SAVINGS*

INCREASED LIFT CAPACITY TO 3200KG

DIRECT DRIVE LOCK-UP IN GEARS 2-6*

NO ADDITIONAL AFTER TREATMENT

* Model dependent

EFFICIENT DESIGN

NO SACRIFICE IN VISIBILITY

ENHANCED INSTRUMENTATION AND CONTROLS

MAX HYDRAULIC FLOW INCREASED TO 160 LPM*

ADJUSTABLE ON-THE-GO CONSTANT FLOW HYDRAULICS

STRENGTH YOU CAN RELY ON

THE TM320 HAS BEEN DESIGNED AND BUILT FROM SCRATCH TO DELIVER THE STRENGTH AND POWER YOU'RE LOOKING FOR IN AN ARTICULATED MACHINE. NO COMPROMISE.

Proven reliability

1 We stress test across a lifetime of cycles to emulate the most arduous digging and dump situations. It's your guarantee of performance over thousands of hours.

2 To prove how good our EcoMax engines are, we've tested them for 110,000 hours in 70 different machines across the toughest applications and environments.

3 At JCB, we make our own hydraulic cylinders, cabs, axles, transmissions and engines – all designed to work in perfect harmony for optimum reliability.

Structural strength

4 The TM320's tough, inverted-U-shaped boom pressing features fully welded closing plates for ultimate strength, and is mounted into a heavy-duty loader tower.

5 A heavy-duty centre joint takes both vertical and horizontal loadings for maximum durability and rigidity.

6 Our high-strength axle mounts provide maximum support and rigidity for the purpose-designed JCB axles.

Well protected

7 The JCB TM320's cast rear counterweight helps prevent impact damage.

8 Recessed rear lights mounted above the counterweight are well protected.

9 Our fold-up rear hitch design prevents impact damage and grounding when working on gradients or uneven ground.

10 The TM320's under-machine protection plates shield the engine and driveline from impact damage.

The hydraulic hoses are routed within the main boom structure to guard against damage.

THE **POWER** TO PERFORM

THE CLASS LEADER WHEN IT COMES TO LIFT CAPACITY AND TEAROUT FORCE, COMBINED WITH 5.2M LIFT HEIGHT, 2.9M FORWARD REACH AND THE SUPERB JCB ECOMAX ENGINE. THERE'S NOTHING THE TM320 CAN'T HANDLE.

JCB EcoMAX Engine

1 TM320 features our EcoMAX T4i engine with variable geometry turbo, giving increased performance at low engine speed for improved cycle times and tractive effort. This 4.4 litre engine delivers a massive 550Nm torque at low engine speeds for optimum response.

For even greater power and performance, the TM320S has the new 4.8-litre 108kw (145hp) EcoMAX T4i engine.

Traction and travel

2 The JCB TM320 gives you ultimate traction and performance in soft, muddy ground, thanks to optional limited slip differentials and 4WD as standard.

3 JCB's Smooth Ride System (SRS) allows the boom and load to move independently of the chassis for better load retention, increased operator comfort and reduced stress on structures.

When roading, the TM320 also reduces fuel consumption thanks to automatic TorqueLock in fourth, fifth and sixth gears.

Our unique oscillating centre pivot point makes the most of traction by maintaining even weight distribution over each of the four wheels. It also gives extra stability and ride comfort.

Hydraulics and versatility

4 The TM320's variable flow auxiliary hydraulics are easy to use, designed to maximise productivity and efficiency.

This flow sharing system with a variable flow piston pump also allows for multiple functions to be performed at the same time, reducing cycle times.

5 The ability to change flow rate on-the-go is perfect for straw spreader or sweeper use, while the second boom auxiliary option caters for a wide range of attachments.

The TM320S has a new high-flow 160 l/min pump for ultimate productivity.

Loading and operation

6 Lock-up in the torque converter is selectable in gears two and three on the TM320S for enhanced efficiency and productivity.

7 An additional benefit of the TM's articulated steering is the built-in sideshift which makes it easier to position attachments and place loads accurately.

8 The TM320's foot brake features a selectable transmission dump for superb control when loading or rehandling.

Quickhitch options include pin and cone, JCB Q-fit and industrial type.

IN CONTROL, IN COMFORT

THE TM320 MAKES LIFE EASIER. FIRST OF ALL, IT'S EASY TO OPERATE THANKS TO ERGONOMIC, INTUITIVE CONTROLS AND INTELLIGENT FEATURES. SECONDLY, IT GIVES A COMFORTABLE ENVIRONMENT TO WORK IN, MAKING OPERATORS MORE PRODUCTIVE.

At your command

1 From the high, centrally mounted driving position you're in complete control, with a low boom pivot and large glass areas giving an unhampered 360° view.

Eliminating the need for exhaust after treatment means the TM320's EcoMAX engine is extremely compact, so there's no compromise on either visibility or manoeuvrability.

2 Constant flow hydraulics are intuitive to use, with an in-cab display of the flow rate which can be adjusted on the go.

3 The TM320's Smooth Ride System (SRS) is easy to operate via a rocker switch. It can be auto-engaged by travel speed or constantly activated.

4 Manual and Automatic transmission modes put the operator in control of increased transmission performance.

5 The operator can also limit proportional auxiliary flow to adapt the TM320 for using specialist attachments.

A seat-mounted single-lever joystick features gear change for ease of use and improved multi-functioning.

Sitting comfortably

- 6** The TM320 cab is large and roomy with plenty of storage for home comforts and work essentials.
- 7** The TM320 armrest console folds back so you can easily use the right-hand door.
- 8** Boom end damping on lower and retract reduces shock to the operator and the machine itself.

A fully adjustable telescopic steering column allows you to fine tune the driving position.

Also fully adjustable, the supportive mechanical or air suspension seats give real comfort.

SERVICING MADE EASY

THE TM320 IS LOW MAINTENANCE AND EASY TO SERVICE, WHICH MEANS LESS DOWNTIME, AND MORE WORKING AND EARNING TIME. IT'S ALSO DESIGNED FOR CONSUMMATE SAFETY, PROTECTING BOTH YOU AND YOUR INVESTMENT.

Maintenance made easy

1 Most T4i engines use a Diesel Particulate Filter (DPF) or SCR requiring additional AdBlue fluid level maintenance. JCB EcoMAX doesn't, reducing service and running costs.

2 The wide-core single-faced cooling pack delivers maximum performance and lets small materials pass though for less cleaning.

A cyclonic air cleaner reduces debris build up in the air filter while an air intake scavenge system removes debris, extending service intervals.

3 TM320's wide-opening rear bonnet gives clear access to service points, grease points are easily accessible and no tools are required to access the battery.

4 TM320's self-lubricating boom wear pads and dry boom lubrication provides virtually maintenance-free operation.

Keeping you safe

5 TM320 offers superb all-round visibility: high, central driving position; expansive glass panels and roof glass; narrow cab pillars; and sloping rear bonnet.

6 Our in-cab, electronic 2-stage quickhitch isolation protects against uncontrolled release of attachments.

7 The operator presence switch disables drive on leaving the seat, preventing accidental operation.

8 TM320 features a reverse alarm as standard.

9 JCB Adaptive Load Control automatically prevents the machine from overturning forwards when handling heavy loads.

A SMART INVESTMENT

WHEN YOU OWN A JCB, YOU OWN A MACHINE THAT'S RENOWNED FOR HAVING HIGH RESIDUAL VALUES AROUND THE WORLD. COMBINED WITH EFFICIENT DESIGN THAT SAVES YOU MONEY, IT'S A REAL BUSINESS ASSET.

EcoMAX saves you money

1 The TM320 EcoMAX engine uses less fuel than our Tier 3 engines, saving you money.

The TM320 also saves on service costs – the EcoMax engine doesn't need exhaust after treatment, so it doesn't require costly heat-resistant lube oils.

2 EcoMAX also produces high levels of power and torque at engine speeds as low as 1500-1600 rpm for fuel-efficient matching of transmission and hydraulics.

Even more savings

3 TM320's load-sensing hydraulics only consume power on demand, conserving fuel.

A business asset

The proven demand for JCB brand machines, supported by our legendary productivity and build quality, equals high residual value.

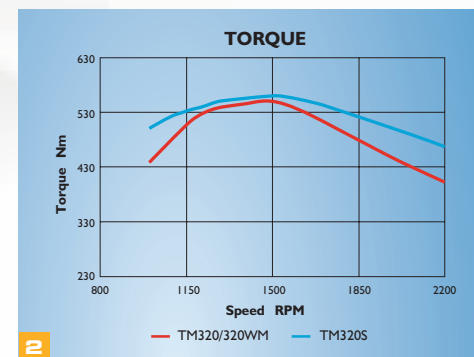

The TM320s EcoMAX engine can be adapted to run on lower-grade fuels, allowing it to be resold across different territories for further improved residuals.

ALL-ROUND PROTECTION

THE TM320WM MODEL IS TAILORED SPECIFICALLY FOR THE ARDUOUS WASTE AND RECYCLING ENVIRONMENT. THIS MEANS INCREASED PROTECTION FOR MACHINE AND OPERATOR, ENSURING MAXIMUM SAFETY, UPTIME AND PRODUCTIVITY.

Total protection

- 1** The TM320WM features front and top window screen guards to give increased protection against falling debris.
- 2** Choose from a wide range of tyres for added puncture resistance and maximum uptime, including Michelin XmineD2 and solid cushion options.
- 3** Front and rear light guards protect against damage.
- 4** Extra-duty under-machine protection and a top boom guard prevent costly impact damage and debris build up.
- 5** Our steel front fender options increase impact resilience.
- 6** The TM320WM's optional front chassis guard protects against impact damage to the front of the machine.

LIVELINK, KNOWLEDGE IS POWER

JCB LIVELINK IS AN INNOVATIVE SOFTWARE SYSTEM THAT LETS YOU MONITOR AND MANAGE YOUR MACHINES REMOTELY – ONLINE, BY EMAIL OR BY MOBILE PHONE.

LIVELINK GIVES YOU ACCESS TO A WHOLE HOST OF USEFUL DATA, INCLUDING MACHINE ALERTS, SERVICE DATA AND EVENT HISTORY INFORMATION. ALL YOUR MACHINE INFORMATION IS HANDLED AT A SECURE DATA CENTRE FOR YOUR PEACE OF MIND.

Productivity and cost benefits

Machine location information can improve fleet efficiency and you may even enjoy reduced insurance costs courtesy of the added security that LiveLink brings.

Note : Please consult your local dealer for LiveLink availability

Maintenance benefits

JCB LiveLink makes it easy to manage machine maintenance. Accurate hours monitoring and service alerts improve maintenance planning, and real-time location data helps you manage your fleet. You'll also have access to critical machine alerts and maintenance history records.

Security benefits

Keep your machine operating safely with JCB LiveLink. Real-time geofencing alerts tell you when machines move out of predetermined operating zones, and real-time curfew alerts inform you if machines are being used when they're not supposed to be. Real time location information helps you store your machines in the safest places.

VALUE ADDED

JCB'S WORLDWIDE CUSTOMER SUPPORT IS FIRST CLASS. WHATEVER YOU NEED AND WHEREVER YOU ARE, WE'LL BE AVAILABLE QUICKLY AND EFFICIENTLY TO HELP MAKE SURE YOUR MACHINERY IS PERFORMING TO ITS FULL POTENTIAL.

1

1 Our Technical Support Service provides instant access to factory expertise, day or night, while our Finance and Insurance teams are always on hand to provide fast, flexible, competitive quotes.

2 The global network of JCB Parts Centres is another model of efficiency; with 15 regional bases, we can deliver around 95% of all parts anywhere in the world within 24 hours. Our genuine JCB parts are designed to work in perfect harmony with your machine for optimum performance and productivity.

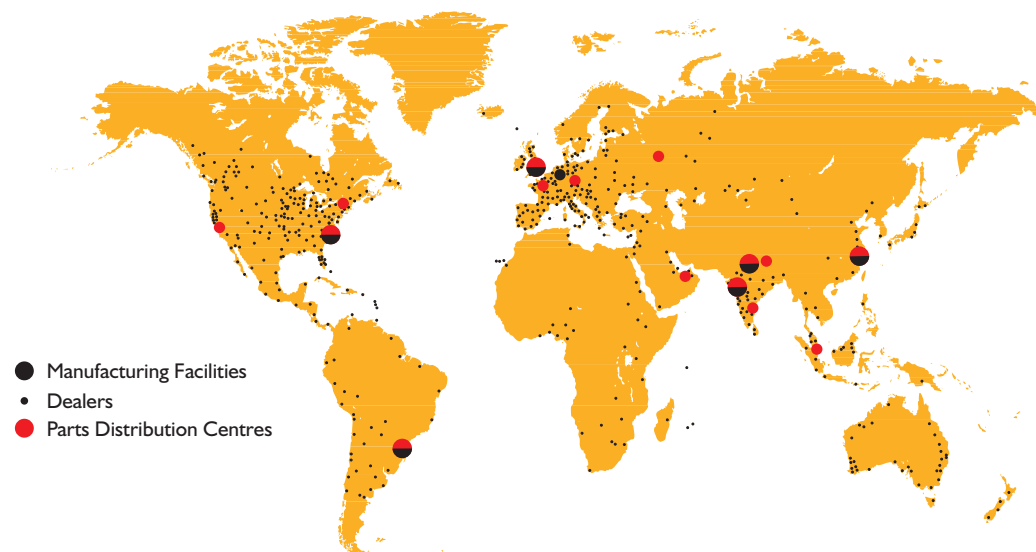

2

3 JCB Assetcare offers comprehensive extended warranties and service agreements, as well as service-only or repair and maintenance contracts. Irrespective of what you opt for, our Maintenance teams around the world charge competitive labour rates, and offer non-obligation quotations as well as fast, efficient insurance repair work.
