

NEW

MULTI SHOVEL

JCB are now offering a brand new range of multi shovels to suit machines from 525-60 to 541-70.

- The new range offers increased shovel load capacity meaning higher productivity
- Now available as a fully fabricated grab or a forged bolt-on option which can be easily replaced
- With 32 variants and 2 tine types as well as a variety of pick up options, the multi shovel offers great versatility
- The grab opens to 1.75m, enabling the easy handling of silage, manure, timber, round and square bales
- Offering a wider choice, the new multi shovel has both weld-on and bolt-on toeplates
- Larger size of grab meaning a higher load capacity and increased size of spill guard but still maintaining great visibility
- Level indicator has been added for shovel positioning and efficiency
