PATCH PLANERS

JCB Attachments have introduced a new range of patch planers to fit your JCB Backhoe loader machine, committed to prove efficient and productive solutions for a variety of planing applications.

- The PL300 is the perfect match for the 3CX Compact machine, with a 300 mm drum width and 36 replaceable picks
- The PL350 will perfectly fit the 3CX, with 350 mm drum and 42 replaceable picks.
- Ideal for planing asphalt or any other hard and compact surfaces
- A stone guard is fitted to prevent material being ejected out of the side of the planer and a hydraulic protection is available to reduce the risk of accidental reverse operation
- Drums can be easily cleaned and maintained for an extended working life
- Supplied ready to use, fitted with a set of asphalt picks, hanger bracket, hoses and couplings
