GUNN JCB

WELCOME

Business in the first quarter of 2019 has continued to be strong and we are pleased to hear that you continue to enjoy high demand for your JCB machines.

Our industry continues to demonstrate great resilience to political uncertainty as we just get on with the high level of work that we have. Thank you for continuing to invest in JCB equipment, parts and servicing in order to do so.

As always, we have lots to tell you about new products. Building on the success of the all new 220 X SERIES tracked excavator, we are now delighted to be able to tell you about the next models in the X SERIES.

The 131X, 140X and 150X join the already highly acclaimed 220X in the all new JCB excavator range.

Your Gunn JCB salesman will be delighted to tell you more about these products and to demonstrate the performance and durability that these new machines deliver.

At the smaller end of the scale, we have the new, all electric 19C-1E. A full day's work from a single charge and the full performance of a diesel excavator.

We have some great offers on machines, some special servicing packages and some competitive finance to make sure that we can tailor the right deal for you.

The Gunn JCB team will work closely with you to keep you going through what promises to be more busy times ahead.

Paul Hartshorn
Managing Director

NEW STARTERS

We have witnessed more growth over the first six months of 2019 and our team has grown as a result. We are delighted to welcome the following new members:

Employee	Depot	Job Title
Adam Wills	Altrincham	Parts Advisor
Stephen Millington	Altrincham	Parts Advisor
Richard Mason	Altrincham	Improver Engineer
Darren Mellor	Altrincham	Service Engineer
Mark Knight	Altrincham	Service Engineer
John McCann	Altrincham	IT Systems Administrator
Malcolm Kershaw	Altrincham	IT Systems Administrator
Robert Birch	Hereford	Service Engineer
Kane Bailey	Marchington	Service Engineer
Joseph Smith	Marchington	Service Engineer
Glen Smart	National	Service Engineer
Philip Keynes	National	Service Engineer
Lisa Alvarado	National	Servicing Controller
Ryan Muirhead	National	Service Engineer
Joshua Arthurs	National	Service Engineer
James Cornmell	Shrewsbury	Service Engineer
Jessica Kilvert	Shrewsbury	Improver Engineer
Ivan Bailey	Stoke	Service Engineer
Kyle Shaw	Stoke	Parts Operative
James Turner	West Midlands	Service Engineer
Darren Clark	-	Customer Support and Inspection Technician
Kieron Belshaw	-	Industrial Sales Manager

CHANGES TO THE SALES TEAM

Gareth Baxendale switched to a newly created position in our Construction sales team in April. He originally joined Gunn JCB back in August 2017 as Industrial Salesman and has done a great job for us with the industrial range of products. He's now looking forward to selling the full range of machines in his patch which includes Liverpool, the Wirral and part of Cheshire. Prior to working at Gunn JCB, Gareth worked at the Malcolm Group for ten years where he progressed from Forklift Driver to Warehouse Manager. In 2013, Gareth started his career in material handling sales, working as a Sales Manager for Cooper Materials Handling (part of the Cooper Handling Group) and progressed to the position of Nationwide Dealer Manager. Congratulations to Gareth on his new role from the team at Gunn JCB.

For construction machine enquiries, contact **Gareth** on **07740 826197** or email gareth.baxendale@gunn-jcb.co.uk

Gareth's move to construction sales created a gap in our industrial sales team which was filled by Kieron Belshaw who was appointed as Industrial Sales Manager in April.

Kieron brings with him a wealth of experience from within the materials handling industry and is focusing on selling the JCB Teletruk range and our aftermarket solutions in the northern part of our territory.

A fully qualified motor mechanic by trade he joined Windsor Materials Handling in 2008 as a Field Service Engineer and quickly went on to become a stand-in Service Manager for twelve months. In 2010, Kieron joined Global Materials Handling as a Field Service Engineer / Team Leader for four years prior to trying his hand in sales; initially as Sales Executive responsible for new business development. He then became Sales Manager responsible for a team of five ultimately growing the company's market share.

Kieron is pleased to be selling the JCB Teletruk range, including the new electric Teletruk;

"I am delighted to join Gunn JCB and to be working with arguably one of the best industrial, construction and agricultural UK manufacturers around. I am looking forward to selling the JCB Teletruk including the brand new electric version. Everyone I have met at Gunn JCB and JCB seem to be really helpful and knowledgeable and I am excited to be part of a great company."

The whole team at Gunn JCB extends a warm welcome to Kieron.

For industrial machine enquiries, contact **Kieron** on **07740 826175** or email kieron.belshaw@gunn-jcb.co.uk

OUT AND ABOUT WITH GUNN JCB

We have been exceptionally busy over the last six months attending and running shows to showcase the latest machines in our range.

MASTERS OF WASTE DAY, 4TH DECEMBER 2018

Back in December last year, we entertained 33 customers at a 'Masters of Waste' day at JCB Headquarters to highlight the dedicated range of waste machines that we offer.

David Banks, General Manager (Waste & Recycling Sector) at JCB, delivered a presentation in the theatre at JCB's VIP Visitors Centre which focused on Gunn JCB and JCB waste machines. This was followed by a talk from Ben Sellers, Territory Manager at JCB Finance who covered the range of finance options available.

Our guests enjoyed a visit to the popular 'Story of JCB', an interactive exhibition that guides guests through the history of JCB. Following a tour of the Loadall telescopic handler production line and a well-deserved lunch, customers visited Kevin Quarry for an action packed demonstration of JCB waste machines.

DIG DAYS

DIG DAY, 23RD MARCH

The best laid plans for our dig days in Wales were somewhat thwarted due to localised flooding in Caernarfon; resulting in the cancellation of our first Dig Day there on Saturday 16th March. However, the rain didn't stop play for our second Dig Day which thankfully went ahead on Saturday 23rd March in Dolgellau. We were even blessed with sunny, warm and dry conditions. With a large range of excavators on display including the: 15C-I, 18Z-I, 19C-I, 8026 CTS, 51R-I, 86C-I and 100C-I from our mini and mid ranges, plus the newly launched 14 tonne JZ141 excavator and a range of attachments, the day didn't disappoint. Customers were given the opportunity to operate machines to get a feel for the durability, controllability and stability for themselves.

Our operator challenges are always popular and included a lifting game, where the operators had to slot pieces together and a painting competition where participants had to draw 'JCB' in the fastest time. The winners - Rino Perruzza from WPS Logistics Ltd and Michael Pritchard from Maddox Contractors, completed the tasks in an impressive 54 and 35 seconds respectively. We received enquiries and demo requests for the full range of machines and our current offer on JCB Trackmaster rubber tracks also generated a lot of interest.

JCB HQ CUSTOMER VISIT, 17TH APRIL

Trips to the JCB factory are always very popular with customers and our visit during April was no different. With a bias towards the excavator range, the day included a tour of JCB Heavy Products in Uttoxeter and ended with demonstrations at Kevin Quarry.

STAFFORDSHIRE COUNTY SHOW, 29TH & 30TH MAY

Our annual outing to the Staffordshire County Show was once again a great success. We retained stand 33 (thanks to its excellent location next to the main ring) where a wide range of attractions took place over the course of the two days, including a motorcycle display team, livestock parades and show jumping.

The Gunn JCB display included the brand new 140X excavator and 19C-IE electric mini excavator which generated significance. They were complemented by: a range of mini excavators, a JCB Hydradig with a Steelwrist tiltrotator, 406 compact wheel loader, 3CX backhoe loader, 7T-1 Hi-Viz dumper and a G40RS generator. A limited edition HTD5 dumpster with Union Jack branding patriotically drew the crowds to our busy stand. We took multiple requests for machine demonstrations – in particular for the new 140X. Visitors were able to sit in the cab to experience the outstanding levels of comfort thanks to its industry-leading Grammer seat with wide, adjustable arm rests and 145° recline. The new 19C-IE electric mini excavator with features such as the fast charge option, allowing a full charge in 2.5 hours and the lack of electrical power connection during operation, attracted great interest too.

ABERYSTWYTH & CEREDIGION COUNTY SHOW, 8TH JUNE

Show season continued in June with the Aberystwyth and Ceredigion County Show taking place on Saturday 8th June at Caeau Gelli Angharad. This annual agricultural show never disappoints and events on the day included livestock shows, trade stands and produce. Plus, of course, our stand with a 16C-I, 19C-I, 8026, 51R-I and two HTD5 dumpsters on display. Wrapped in the Union Jack flag and the flag of Wales respectively, the two dumpsters looked very patriotic and striking and we received a number of enquiries for them, as well as for our mini and midi excavators.

Merioneth County Show
28th August 2019

NEXT SERIES

INTRODUCING THE NEXT IN THE X SERIES

The new JCB 13-15 tonne excavators sit perfectly alongside their highly acclaimed 20 tonne big brother and they are manufactured using the same quality materials and proven components. Three new models – the 131X, the 140X and the 150X – can be specified with a wide range of dipper options and tailored to suit every application.

Quick Specs	131X	140X	150X
Max Engine Power	55kW*	81kW	81kW
Max Bucket Capacity	0.89m ³	0.89m ³	0.89m ³
Operating Weight	14,819kgs	14,952kgs	15,552kgs

*no DEF

HIGHLIGHTS

- Proven undercarriage with fully-welded X frame
- Flat revolver side skirts and double skinned doors
- Low in-cab noise of 67 dB(A)
- Spacious JCB CommandPlus cab
- Powerful new HVAC with 11 targeted vents
- Proven Japanese hydraulics

EXPERIENCE GREATER PERFORMANCE

- Best in class productivity
- Large diameter hydraulic pipes and hoses
- Innovative hydraulic regeneration system that recycles oil across all cylinders
- Auto-stop and auto-idle provides fuel savings of up to 5%
- Tier 4 engine
- Powerboost button increases pressure by up to 9% for up to 9 seconds for extra tear out in tough conditions

EXTREMELY EASY

- Start stop button
- Start sequence enables digging to commence within 2 seconds
- Pipework shut-off taps are supplied as standard for quick attachment connection
- Easy quickhitch provides simplified operation including override for removing larger breakers or forks
- Advanced Tool Select system improves attachment handling by monitoring pressure and flow

EXCEPTIONAL COMFORT

- CommandPlus cab is fitted as standard
- High quality, injection moulded interior
- Grammer seat with wide adjustable arm rests and 145° recline
- Improved isolation using latest double cushion viscous mounts to reduce vibration and noise
- Standard cool/heat box
- 11 targeted vents to provide the perfect temperature

EXTREME STRENGTH

- Whole machine shaker rig replicated 15,000 hours of tracking and vibration
- 30,000 window and door operation tests to prove component durability
- Hot and cold climate testing (55°C to -30°C) in controlled conditions and locations globally
- Proven engine technology that is tested in over 70 different machines working in the toughest applications and environments

To view the 131X, 140X and 150X brochures, visit www.gunn-jcb.com/downloads

To enquire about these new machines, contact the sales person at your local Gunn JCB depot.

ZERO EMISSIONS MINI MAKES COMPANY HISTORY

JCB launched its first ever electric excavator at the Executive Hire Show in 2019. It is not only the quietest machine in the range but also delivers zero emissions. The brand new JCB 19C-1 E-TEC mini excavator was developed in top secret at JCB's World Headquarters in Staffordshire and will be available to customers later in the year. It forms part of a drive towards lower emissions and will allow contractors to work inside buildings and in emissions-sensitive inner city environments. It will also allow rail contractors to operate in tunnels and underground, without having to install costly exhaust extraction equipment. External noise, at 7dBA lower, is a massive five times quieter than its traditional diesel powered counterpart and means contractors can work after normal hours in urban streets without disturbing residents, as well as operating in other noise sensitive environments including hospitals and schools. There is no compromise on digging performance with the fully charged electric machine capable of putting in a full shift in normal operation. Also, with no daily checks of coolant and engine oil levels required, the machine is off to work quicker than its diesel counterpart.

KEY FEATURES:

- Three lithium-ion battery packs provide a 312Ah (15kWh) storage capacity
- A standard load-sensing hydraulic system delivers powerful digging performance
- Convenient on-board charger with 230V input for 6-hour recharging capability
- The option for 110V charging when required
- Sophisticated battery management system ensures full-shift availability
- Fast charge option on launch allows a full charge in 2.5 hours
- 48V electrical system

JCB TELETRUK GOES ELECTRIC

Hot on the heels of the introduction of a new electric mini excavator, JCB has introduced similar technology to its unique, forward reach, counterbalance industrial forklift. The JCB Teletruk range has previously been offered with diesel and LP gas-powered engines and used mostly in outdoor applications.

With the launch of the new electric model, the JCB 30-19E Teletruk, it now becomes suited for a wealth of tasks inside buildings as well as outside – offering a new generation of customers the cost and space saving advantages enjoyed by users over the past two decades.

Power is provided by an 80-volt lead acid battery which can work a full eight hour shift on a single charge. The battery compartment is positioned at the rear of the truck and has been designed to allow quick and easy battery changeover. Using a single point hoist or another lift truck, the battery can be swapped in around 2 minutes, ensuring truck uptime is maximised.

The new Teletruk can climb a 21% gradient or ramp and productivity is further enhanced with a full free lift of 1575mm as standard. Like all Teletruk models, the JCB 30-19E features a side-mounted boom and using the telescopic forward reach, it has a lift capacity of 1,900kg at 2m meaning palletised loads can be loaded to the far side of a curtainsided trailer or a 1,600kg load can be placed 3m into a van. The machine can load three euro pallets into a van within two minutes.

0% INTEREST HIRE PURCHASE OVER 3 YEARS ON JCB ELECTRIC TELETRUK

Available on machines ordered by 30.09.2019. UK business users only. Terms apply.

WHC HIRE SERVICES SWITCHES TO E-TEC

One of our customers, WHC Hire Services, has a mixed fleet of JCB machines that are rented from the company's three depots in Worcester, Tewkesbury and Oxfordshire. The company has recently purchased 7 of the new 140X tracked excavators as well as a range of 30 compact excavators. Hot on the heels of this large order, WHC Hire Services has now also taken delivery of its first JCB 19C-1E mini excavator.

The industry's first fully electric machine, it was previewed last year and launched at the Executive Hire Show earlier this year and is currently attracting a lot of attention thanks to its zero emissions output at the point of use and exceptionally low noise levels. The machine can do a full day's work on a single charge and is ideal for working in city centres and at night time; minimising disturbance and pollution.

James Clutterbuck, Managing Director of WHC Hire Services, prides himself and his business on its innovative and ecological credentials and is trialling the machine with a number of customers who are interested in reducing their own environmental footprint;

"We think our customers will really see the benefit of the new JCB electric machine. Not only are we working towards a greener environment but also a reduction in noise pollution, which can be a real issue in the construction and utility market. WHC always likes to be at the forefront of innovation and this was the perfect opportunity. We have a long-standing relationship with Gunn JCB who continue to provide us with excellent customer service and back up when we need it."

PLANT HIRE UK PLACES ORDER FOR ALMOST £17 MILLION

Plant Hire UK, one of our largest and long-standing customers, is investing in a new fleet of JCB machines including 300 JCB Loadall telehandlers and 50 JCB compact excavators, plus a number of site dumpers and tandem rollers. The machines, worth almost £17 million, will be put to work by contractors on construction and civil engineering projects across the country and will add to Plant Hire UK's vast fleet of JCB machines.

Plant Hire UK's Managing Director, Graham Jones, said: ***"As the construction sector goes from strength to strength, this investment in new JCB machinery ensures our customers are guaranteed the highest specification machines with outstanding safety features and telematics support as standard."***

Our Managing Director, Paul Hartshorn said: ***"Plant Hire UK is one of our largest and most successful customers. Gunn JCB depots are perfectly located to support the ever-growing number of machines as Plant Hire UK has continued to invest in its fleet."***

Plant Hire UK was founded in 2005 by Managing Director Graham Jones and Finance Director Wayne Illidge. Based in St Helens, Merseyside, it has a national customer base, hiring, maintaining and servicing thousands of machines on sites across the UK.

Pictured (left to right) are: Yvette Henshall-Bell, Graham Jones and Paul Hartshorn - managing directors of JCB, Plant Hire UK and Gunn JCB respectively.

IT'S A WRAP!

One of our customers, Liverpool City Council, took delivery of their striking new G200QS generator in March. The unit will be used as a standby generator for the Cunard building (next to the Liver building) in Liverpool in the event of a power outage.

The Cunard building is a Grade II* listed building so we were tasked to make sure that the generator blended in with the granite block work. We designed a wrap that provided the perfect disguise for the unit and the accompanying vertical fuel tank. A custom-made black steel top cover was supplied to cover the two separate parts; effectively disguising them as one unit as per our client's brief.

We were fortunate to work with a local supplier, Uttoxeter-based Tuffa Tanks, who made a custom fuel tank with a very quick turnaround. Heritage conservation rules precluded the use of the standard fuel tank that would normally be supplied with the G200QS. Our partnership with Tuffa Tanks enabled us to deliver a unit with an alternative routing for the main power cables.

Our engineers installed lighting inside and outside of the generator to assist when work is being carried out and the unit features JCB LiveLink as standard. This will enable Liverpool City Council to monitor essential operational data to manage the health of their generator. To minimise disruption to the council, the whole installation took a total of 5 hours from making the work area safe, to lifting it into place and commissioning the set.

We think the bespoke wrap is the perfect disguise!

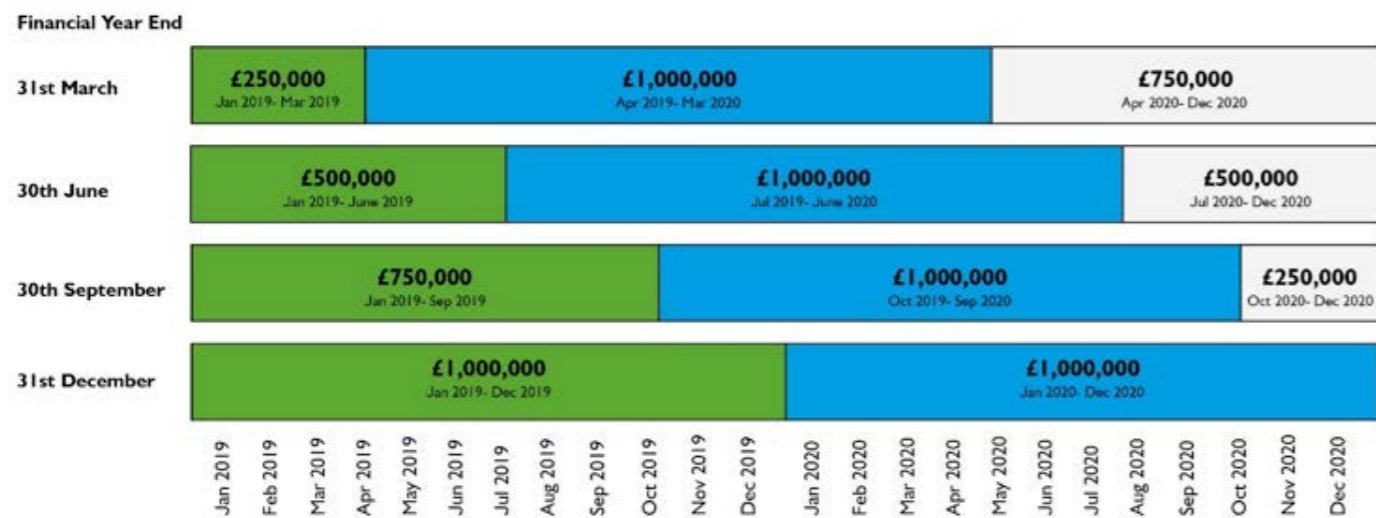

ANNUAL INVESTMENT ALLOWANCE (AIA)

The announcement by the Chancellor in the last budget of a temporary increase in the Annual Investment Allowance (AIA) from £200,000 to £1,000,000 has come as good news for customers thinking of purchasing JCB machines over the next 18 months. The increase is scheduled to revert back to £200,000 on 1st January 2021.

The enhanced AIA is available for capital expenditure on plant, machinery and commercial vehicles (not cars) purchased from now until 31st December 2020. This is an important tax incentive which accelerates the tax relief so that 100% of eligible expenditure can be offset against taxable profits in the first year instead of taking up to 12 years to reclaim 90% of the original costs using the normal 18% annual writing down allowance. In effect, this enables businesses to save £1 in taxable profits for every £1 spent. The net benefit will depend on the rate of income tax or corporation tax that your business pays. It is the equivalent of a subsidy to encourage businesses to invest in plant and machinery.

Capital expenditure via a Hire Purchase (HP) agreement is also eligible and enables a terrific cash flow advantage. Potentially, your business could gain up to £1,000,000 in tax relief after only having paid a deposit and the interest charge is also 100% tax deductible. All businesses can claim the AIA – the only exceptions are Mixed Partnerships or Trusts (i.e those in which a company is a member).

Timing is critical and the chart below illustrates maximum amounts available by showing four different financial year end companies and how vital it is to spend the right amount within the right periods in order to maximise tax benefits. Always seek advice from your accountant or tax advisor as every business' circumstances are different.

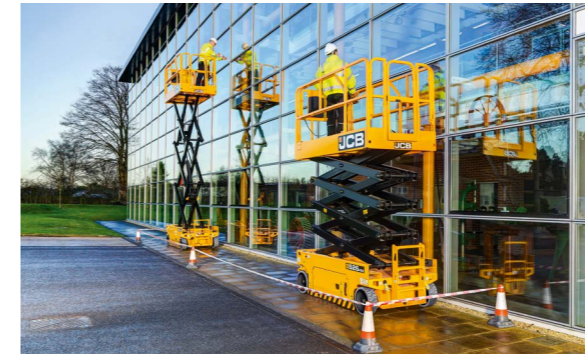

Finance is restricted to business users in the United Kingdom, subject to acceptance by JCB Finance Ltd and our usual affordability checks. Neither JCB Finance Ltd or Gunn JCB are a tax or financial advisor - always seek advice from your accountant or finance director, because every business' circumstances are different. Businesses should not make investment decisions purely on a tax basis - there should be a compelling business case for the investment

GUNN JCB OFFERS

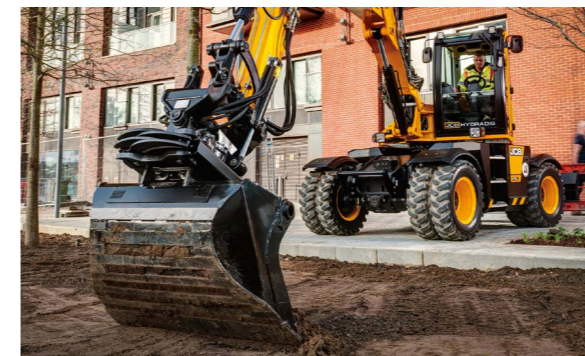

We always have a selection of finance offers on selected machinery. When combined with the new AIA, it really does make sense to invest in machinery this year. All offers are available on orders placed by 30.09.2019 via Gunn JCB. UK business users only. Terms apply.

90 Days payment pause available on Hire Purchase on the JCB Access Range

This Hire Purchase offer involves the VAT payable on signing. 1st payment payable after the 90 day payment pause and the 45 monthly payments will commence 30 days later (120 days after signing).

WE HAVE A WINNER

One of our customers Mr R J Edwards, Owner of R J Edwards Agri Contractors, was the lucky winner of a recent JCB Lubricants campaign which netted him an amazing prize of £3,000 worth of holiday vouchers.

The promotion ran from 1st October 2018 to 31st December 2018 with customers spending over a certain amount being entered into a prize draw. The greater the spend, the more entries to the prize draw each customer gained.

We're delighted that Mr Edwards was the worthy winner. He has been a customer of ours for many years and has always bought genuine JCB parts and lubricants because he truly sees the benefit of buying genuine JCB.

Stuart Hilditch and Nick Newman from our Shrewsbury depot took Mr Edwards to the JCB VIP Visitors Centre where he was presented with the holiday vouchers by Harry Tinson from JCB. A visit to the 'Story of JCB', plus a tour of the Loadall production line and lunch at the VIP Visitors Centre were also part of the day.

Congratulations to Mr Edwards!
